## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1, 3-10, 12 and 14-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach the estimation of phase errors in a signal using a minimum to maximum envelope technique which comprises determining a minimum envelope value of a received waveform, determining a maximum envelope value of the waveform, calculating a ratio of the minimum envelope value to the maximum envelope value, and converting the ratio to a phase error using a curve fitting technique, as recited in claims 1 and 12.

The prior art of record fails to teach the estimation of phase errors in a signal using a maximum abscissa technique which comprises determining a maximum abscissa value of a received waveform, finding an index of the maximum abscissa value, and calculating a phase error estimate utilizing an arctangent of an angle formed by a line from an origin through a point on the waveform at the index, where the angle is equal to the phase error estimate, as recited in claims 6 and 16.

The prior art of record further fails to teach the estimation of phase errors in a signal using a half angle technique which comprises calculating an envelope of a received waveform, computing an envelope error, finding indices of intersection, interpolating an abscissa and an ordinate, and determining an angle subtended by a line from an origin to an intersection line and the closest axis, where the phase error estimate is twice the determined angle, as recited in claims 9 and 19.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
